NEWTON NURSERIES

PRICES FOR FALL OF 1921 AND SPRING OF 1922.

I am using while they last, catalogues from last year, as there has been, practically, no change in varieties. You will find prices in this list as low as is possible to make them, considering cost of growing nursery stock.

I note that many other nurseries are making prices much higher than you will find mine.

Please make your order from this list instead of catalogue, as prices are much reduced from last year.

I always place quality first. Trees and plants sent out from Newton Nurseries when properly planted and cared for, have given and will continue to give satisfaction. Again, let me urge my customers to place their orders early, as stock is short and I have been unable for several reasons, to fill all orders received. I make an effort each season to grow more stock than the year before, but still the demand continues to exceed the supply.

On April 15, 1921, my packing and fumigating houses were entirely destroyed by cyclone. I have in rebuilding made my packing house much larger and more modern in every respect. This enables me to have ample space for stock, when dug to be placed under cover with roots buried in wet saw dust, which insures perfect keeping, and are sent out in the very best condition.

My fumigating house is one of the most up-to-date in the south, being built entirely of brick and concrete, which renders it absolutely air tight. All stock is kept under the deadly fumes of poisonous gas for forty-five minutes before being packed. This makes it impossible for any living insect or parasite to be on the trees when they are sent out.
